AM2000

Extraordinary

Victor has introduced internationally advanced technologies and processes, and boasts a team of high-caliber engineering and technical personnel as well as skilled production workers. The quality of its products has reached the advanced level among domestic counterparts and beyond. Additionally, the company has established a comprehensive after-sales service system. The product quality, sound after-sales service, and user training system of Victor serve as the three cornerstones for the trouble-free operation of its dental equipment, and also provide a solid guarantee for the company's continuous development.

AM2000

**Precision, Comfort,
Safety**

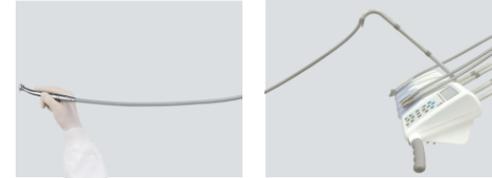

- **Intelligent Adjustment:** Supports preset treatment positions for more efficient doctor operation and easier patient standing
- **Silent Drive System:** Eliminate mechanical noise disturbance, focus on every treatment detail
- **Choose Your Preferred Operation Mode:** Aligns with usage habits, boosts work efficiency

AM2000

Focus on Treatment Easy Operation

- Upper Feeding Cable Delivery Unit Design: Optimal injury-free standing posture, soreness prevention from poor postures, weight-distributed handheld tools for effortless use.
- Patients will not contact with cables when getting on or off the dental chair, and there is no risk of instruments falling.
- The rotating tray provides the dentists the more convenient access to tools during the operation and enhance the work efficiency.

AM2000

**Moves Smoothly
Effortless Operation**

- The cart type delivery unit can expand the scope of clinical application. The delivery unit remains stable without changing its position when the chair is adjusted up or down. Its convenient mobility allows dentists to achieve the optimal operating angle when performing different dental procedures, significantly enhancing work efficiency.

AM2000

The Treatment Light, Provides the Comprehensive Illumination

- Three-axis steering, non-deviation, precise operating angle
- It features a single color-rendering element and 4500K color temperature, delivering optimal brightness and softness for extended use to protect your eyes. With sensor-based design and stepless brightness adjustment (8000-40000 LUX), it meets your lighting needs. You can also switch between manual and sensor operating modes
- The convenient linkage control function: light off when the chair's spittoon-position backrest is raised, light on when reclined

- Funnel-type deep cuspidor to prevent splashing while rinsing
- Infrared sensor-controlled water supply
- The operational design of flushing the cuspidor first then supplying water ensures the cleanliness of the cuspidor

- The function panel enhances precise function operation and reduces the risk of operational errors
- Multi-angle handpiece holders enhance the operational convenience and accommodate usage habits

- Upholding German craftsmanship, the dental chair boasts optimal ergonomic design and enables comfortable adjustment of the patient's treatment position.

AM2000

Safe and Reliable

- With ergonomic design, it accommodates different body types and provides the optimal treatment position

- 90° rotating armrest for patient to access to the treatment position easier
- Short-Base Design, providing dentists with foot space during treatment

- The design of the nursing unit is easier to clean and disinfect.

- Multifunctional Foot Controller: It can control functions such as surgical light on/off, dental chair height adjustment, tilting, mouthwash (dispensing), and dental chair reset, effectively enabling touch-free operation.

- From precise control to patient care, and from efficient execution to safety assurance, Victor redefines the standards of dental care with innovative technology—empowering dentists to focus on professionalism and keeping patients' trust as always.
